

# Animals and Offspring

Draw a line from the riddle on the left to the baby animal that fits it best on the right.

This baby is so tiny,  
It would fit in a spoon.  
Before it grows up,  
It'll spin a cocoon.

This baby is yellow and  
covered with fluff. It  
pecks at the ground 'til  
its eaten enough.

This swimming baby  
will get a surprise. It'll  
grow 4 long legs and  
eat lots of flies.

This baby keeps  
warm on its daddy's  
feet. It will be black  
and white and have  
fish to eat.

This baby has flippers  
and swims very well. It  
doesn't have teeth and  
carries a shell.

This baby's eggs are the  
biggest around. It has 2  
small wings but can't leave  
the ground.
